TABLE OF CONTENTS

ABOUT US

ICT Misr is an enthusiastic IT consultancy firm and system integrator with headquarters in Egypt. It is committed to leverage its clients with the "Edge of Tomorrow" in information and communication technology. We offer businesses a wide range of solutions in HW infrastructure (compute, storage & network), cloud and virtualization, business continuity, security, systems management, data and information management, and business intelligence and advanced analytics.

EDGE OF TOMORROW

OUR VALUES

At ICT MISR, our values make the cornerstone of our business. Starting from recruitment of talents to handling client projects, we always set our sights on values:

- Client's interests come first
- Teamwork toward benefit of all stakeholders
- Work with professionalism and integrity
- Work hard and focus on details to deliver high quality

KEEPING OUR EYES ON OUR "EDGE OF TOMORROW" UNRESTRICTED GOAL, WE CAN ACHIEVE THE UNACHIEVABLE

When we stop at our limits, we will always end up there, but if we keep pushing ourselves beyond these limits, we will go places we've never been.

MISSION

To effectively provide our clients with innovative technology solutions taking in consideration cost efficiency and quality staffing.

VISION

To be the undisputed leader in Systems Integration, Data Management, and Analytics.

Culture Statement

We foster a professional and flexible culture in line with our business goals and professional goals of our employees. We adopt an open-door policy to be always aware of the needs of our employees. Such culture enables our people to give a 100% to our clients.

CEO STATEMENT
MOHAMED EL-MOFTY
CEO AND CO-FOUNDER

Across 2021, we had achieved, in ICT Misr, great success, we acquired special partnerships with new vendors, took good steps in working with governmental sector, and introduce successful solution in Banking sectors.

In 2022, we are approaching further success and another series of achievements. ICT Misr targets more expansion and cooperation with the Governmental organizations, beside penetrating new sectors like Defense industry.

That gives us more opportunities to implement more technologies, gain more vendors and customers and thus; double our profit and success.
We also are keen to do that with growing our team, as they are our greatest advantage. In ICT Misr, we are not buying the technology, we are teaching our customers how to do it!

And that happened by our high-skilled team.

In 2022, we are growing our team on the same basis of knowledge, loyalty and strong bonded teamworking.

TECHNOLOGIES

We pursue IT innovation based on our belief in the infinite possibilities of ICT technology. This pursuit, teamed up with our rich experience in the field, enabled us to put the latest cutting-edge technologies into action. We offer a wide range of solutions that support strategic decision making and optimize day-to-day operations.

Hardware Infrastructure

HW infrastructure with scalable computing power is what your business needs. As Partners of Dell technologies, VMware, and Oracle, we have it all in top- rated solutions; From computing nodes, processors, to various storage solutions.

Cloud and Virtualization

Save your space area and hit the Cloud. We bring agile cloud computing and virtualization solutions that help businesses to scale up, without sacrificing time or security.

Security

At ICT Misr, we help our customers address their concerns about critical security challenges in today's modern IT Infrastructure: Extended Perimeter, Evolving Cyber Attacks, and Data Protection Regulations.

Business Continuity

Implement a wide business continuity to protect your business from potential disasters. ICT Misr is a Platinum Partner of Veritas, the leader in data protection and disaster recovery technologies.

Data and Information Management

Forget about your data's vulnerability. We provide cutting-edge solutions for your data and information management. Because your business deserves the best, our solutions have it all: Master Data Management (MDM), data quality, and privacy and security solutions.

Systems Management

Take control of all devices on your network. Our Management technology introduces solutions of endpoint monitoring and analytics. It will bring you the peace of mind; Your IT Team can centrally find, provide, deploy, update, and troubleshoot endpoint devices within your network, keeping your system secure against cyberattacks.

Business Intelligence and Advanced Analytics

Analyzing and reporting big data is big deal. ICT Misr deploys solutions in Business Intelligence, Data Warehousing, and Advanced Analytics for data-driven businesses to thrive. From Machine Learning, to HANA and BI Dashboards, our technologies will make your business stand out in the crowd.

TESTIMONIALS

Ahmed Karim
Chief Information Security Officer
Faisal Islamic Bank

ICT Misr helped the industry with applications and solutions that facilitate the implementation of the cybersecurity framework announced by the Central Bank of Egypt, to reduce cyber threats.

Mohamed Negm
Head of Information Security
MDP

We have a great success story with ICT Misr in IT Infrastructure and are looking forward to having unique experiences with them in Information Security.

Mohamed Nagi
Cyber Security Senior Analyst
ADIB

ICT Misr introduces a lot of new technologies to the market through high-profile vendors, that help in overcoming the evolving cyber threats internationally.

SUCCESS STORY

We had a remarkable experience with National Bank of Egypt (NBE), the first commercial Egyptian bank since 1898. By adopting ICT Misr technologies in partnership with Broadcom, NBE can offer better customer experience for over 16 million customers.
